

Global Renewable Energy Market in Military 2014-2018

Written by Katerina Oskarsson
Thursday, 23 January 2014 00:00

Research and Market analysts forecast that the global renewable energy market in the military sector will grow at a nearly 14 percent compound annual growth rate over the period 2014-2018. The increased adoption of decentralized power generation and the increase in construction of smart grid are among the key contributors of this market growth. [Read more](#) at Reuters.
