The office of the U.S. Assistant Secretary of Defense for Operational Energy Plans and Programs issued the third annual call for proposals for U.S. DoD's Operational Energy Capabilities Improvement Fund (OECIF) which funds science and technology programs to enhance the energy performance of U.S. military forces in the field. This year's topic is " Analytic Methods for Considering Operational Energy ." For this particular program, proposals should come from DoD components and not from non-governmental organizations.
